

JUNIOR FULL STACK DEVELOPER

HUGO DE BOSSCHERE

PROFILE

I'm passionate about software development, with a focus on web and mobile. I enjoy working with modern frameworks and I'm always keen to keep learning. I'm motivated, curious and I like working in a team, but I'm just as comfortable taking the lead on a project. I care about writing clean, readable code that others can easily pick up.

RELEVANT EXPERIENCE

In The Pocket

2025

Junior Full Stack Developer (Internship)

Dok Noord, Ghent

- Built cross-platform mobile apps in React Native and TypeScript, with bug fixes and new features for the Profile Tool team
- Set up state management with Redux and React Query in a production codebase
- Built REST API integrations end to end, from service call to UI
- Developed back-end logic and a WebSocket system in C# for real-time AI interaction with Gemini (ASP.NET Core, Web API)
- Found and fixed threading bugs in a production environment
- Refactored components into reusable code, with positive feedback in code reviews
- Took part in agile sprints with Git, GitLab, Jira and Confluence, and carried out PR reviews
- Built an XR application for Apple VisionOS with Unity and PolySpatial, and presented the demo live to the team
- Trained and implemented object tracking with CreateML and Reality Composer Pro on a Polestar 2

WORK EXPERIENCE

Volvo Logistics

2021-2023

Order Picker Outbound

Oostakker

- Worked independently and efficiently in a fast-paced logistics environment
- Managed goods flows and warehouse processes with attention to accuracy
